

# Happy Graduation!

YOU DREAMED, YOU BELIEVED, YOU ACHIEVED.

I had never thought that I would ever be making a project using Deep Learning model, but all thanks to DPhi platform and DPhi team, I did so. My very big special

Thanks to Chanukya Patnaik for conducting Deep Learning BootCamp and providing such informative learning materials – learning units, live sessions and its slides, Notebooks, etc. that explained all the concept in such an easy and understandable way for an absolute beginner like me. Also my special Thanks to

Raviraj Dasari who was always ready to help me, guide me and resolved my queries even in odd hours. And it is because of his help and guidance that I was able to submit my assignment 2. My special thanks to Julián Miranda, Manish KC, Gunnika Batra for everything in this Deep Learning BootCamp who helped me get started with Deep Learning. My special Thanks to Dipanjan Sarkar, Dikscha Sapra, Pranjal Aswani, Sai Gayatri Vadali, and Joinal Ahmed for the wonderful learning sessions. Also my special Thanks to Farsana for answering and helping me resolve my queries. Thanks DPhi, a wonderful and fabulous learning platform.

## Congratulations!
